

● Metal Tech Alley is a cluster of industry and technology companies that are forging a global pathway through the Fourth Industrial Revolution.

With global leadership in metallurgical science, industrial recycling and Industrial Internet of Things (IIoT) Metal Tech Alley is gaining momentum and attracting like minded entrepreneurs.

## Doing business in BC

						
#1	3 of 5	Fastest-Growing	Largest	2 of top 3	\$26 billion	>150,000
Start-up ecosystem in Canada	Canadian Unicorns	Tech sector in Canada	per capita tech startup cluster in Canada	universities in software development in Canada	in revenue	tech jobs (across all sectors)

  
Digital Fabrication and Advanced Materials/Metallurgy

  
Recycling and Circular Economy

  
Technology and Innovation

## Fenix Advanced Materials

### Taking advantage of the opportunity

Fenix Advanced Materials is a high-technology company specialized in manufacturing ultra-high purity metals for use in Solar Energy, Telecommunications, Commercial & Military Infrared and other markets.

By locating in Metal Tech Alley, Fenix Advanced Materials is utilizing the local supply chain, applying specialist expertise and working with business support organizations to create a new global market for ultra high purity metals.

Fenix takes local raw material and refines it through a patented process to achieve ultra high purity levels. Finished metal product is shipped worldwide and used in both Solar and Semiconductor applications, such as Copper Indium Gallium Selenide (CIGS), Indium Antimonide (InSb) and Indium Phosphide (InP)

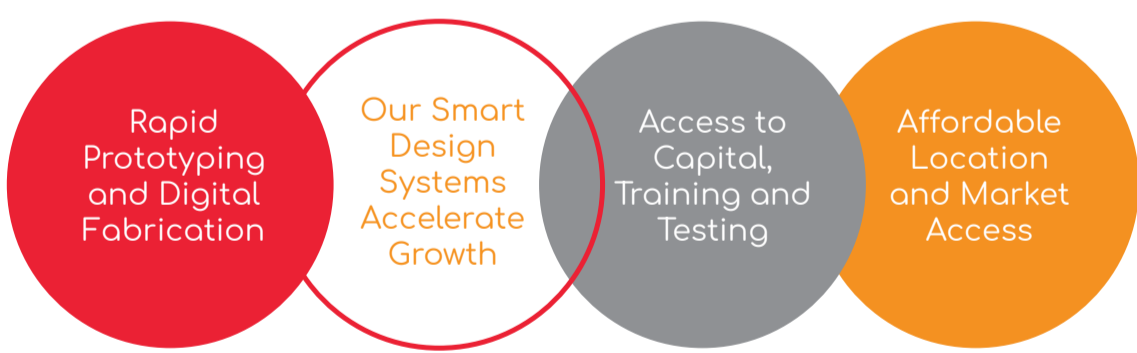

**“Being in Metal Tech Alley has been an asset to our business from day one. Locating in this area has led to connections and business support opportunities that simply do not exist elsewhere.”**

Don Freschi – Fenix Advanced Materials

### ● Why metaltechalley?

Metal Tech Alley is leveraging the mountain lifestyle, setting, access to markets, and affordability to create the perfect opportunity for innovators, disruptors, and adventure-seeking entrepreneurs to conduct big business from Trail, BC.

### We are global experts in:

- Metallurgical Sciences and Advanced Digital Fabrication;
  - Industrial Recycling, Batteries and e-waste;
- Cloud computing, BIG data and Industrial Internet of Things (IIoT).

					
Idea or 2D Plan	3D and IoT Design Model	Data Collection System	Data Analysis Platform	Training	Growth, Attraction Retention

### Join us to:

- Access competitive advantages and world class expertise.
  - Fast track investment and product development.
- Meet partners and connect with support services to help you succeed.
- Work towards a common goal in a positive business environment.
